DETAILED ACTION

1. This application has been examined. The Request for Reconsideration, filed 11/3/03, has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Rich et al (5918228).

4. Regarding claim 1, Rich et al show the method of effecting management tasks in a distributed computing environment cell having at least one web client with a browser connected to a web server (Figure 1, 3, column 1 lines 43-46, column 2 lines 12-25 and 35-40), including a security service (column 2 lines 25-30), including: authenticating a user of the web client by

returning a credential from the web service (column 2 lines 35-43, column 4 lines 43-50, column 5 lines 25-35), responsive to user actions, displaying a plurality of web pages in the browser from which the authenticated user manages the distributed environment cell and managing it accordingly (column 4 lines 55-65, column 5 lines 40-68, column 6 lines 1-15).

5. Regarding claim 2, an administration main menu web page is displayed upon authentication (column 6 lines 7-19).

6. Regarding claim 3, the web page includes hypertext links associated with management command options (column 8 lines 18-45, and inherent within web browsers to use hypertext links).

7. Regarding claim 4, the links are selected (inherent in a browser).

8. Regarding claim 5, a fast path web page may be used which allows a user to perform multiple administrative tasks with a single action (column 7 lines 9-20).

9. Regarding claim 6, a server status web page may be called to view server status (column 8 lines 40-55).

10. Claims 7-18 show the same features as above and are rejected for the same reasons.

11. Applicant's arguments filed have been fully considered but they are not persuasive. The summary of invention and comparison to Rich et al is noted and appreciated. Applicants state that there are features claimed in the present invention that are not in Rich et al. Specifically, with regard to claim 1, applicants argue on the bottom of page 3, top of page 4, and lines 20-33 of page 5 of the response, two features. The first feature is "...displaying a plurality of Web pages in the browser from which the authenticated user manages the distributed computing environment cell" Note though that when applicants argue this, they state it as (bottom line of page 3) 'to manage the DCE cell from *within the Web page* in the browser' yet this is simply not recited. Managing the DCE cell from the browser is done by Rich et al as shown in the aforecited passages (some of which requoted by applicants). The second feature is "managing the DCE cell from the Web browser" which once again is stated differently in applicants' argument as 'performing the management operation in the DCE cell' which, regardless of its anticipation in Rich et al or not, is simply not what the claim recites. The feature, managing the DCE cell from the browser, is taught in Rich et al as shown above. Furthermore, applicants use dependent claim 2 to strengthen the argument, but note that since this feature - an administration page - is shown in Rich et al, then the matter of whether it would add any weight to the argument or not, is moot.

Art Unit: 2174

Regarding claims 3-6, mentioned by applicants in the end of page 5 into page 6, note that the hypertext links are in fact shown, and if applicants mean anything more than what is recited, then this needs to be brought out in the claims.

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
